

VADS VS VIDS ARE YOU CONFUSED?

If so, here's a quick guide to clarify the difference between EN54-23 Compliant **Visual Alarm Devices (VADs)** and Non Compliant **Visual Indicating Devices (VIDs)**.

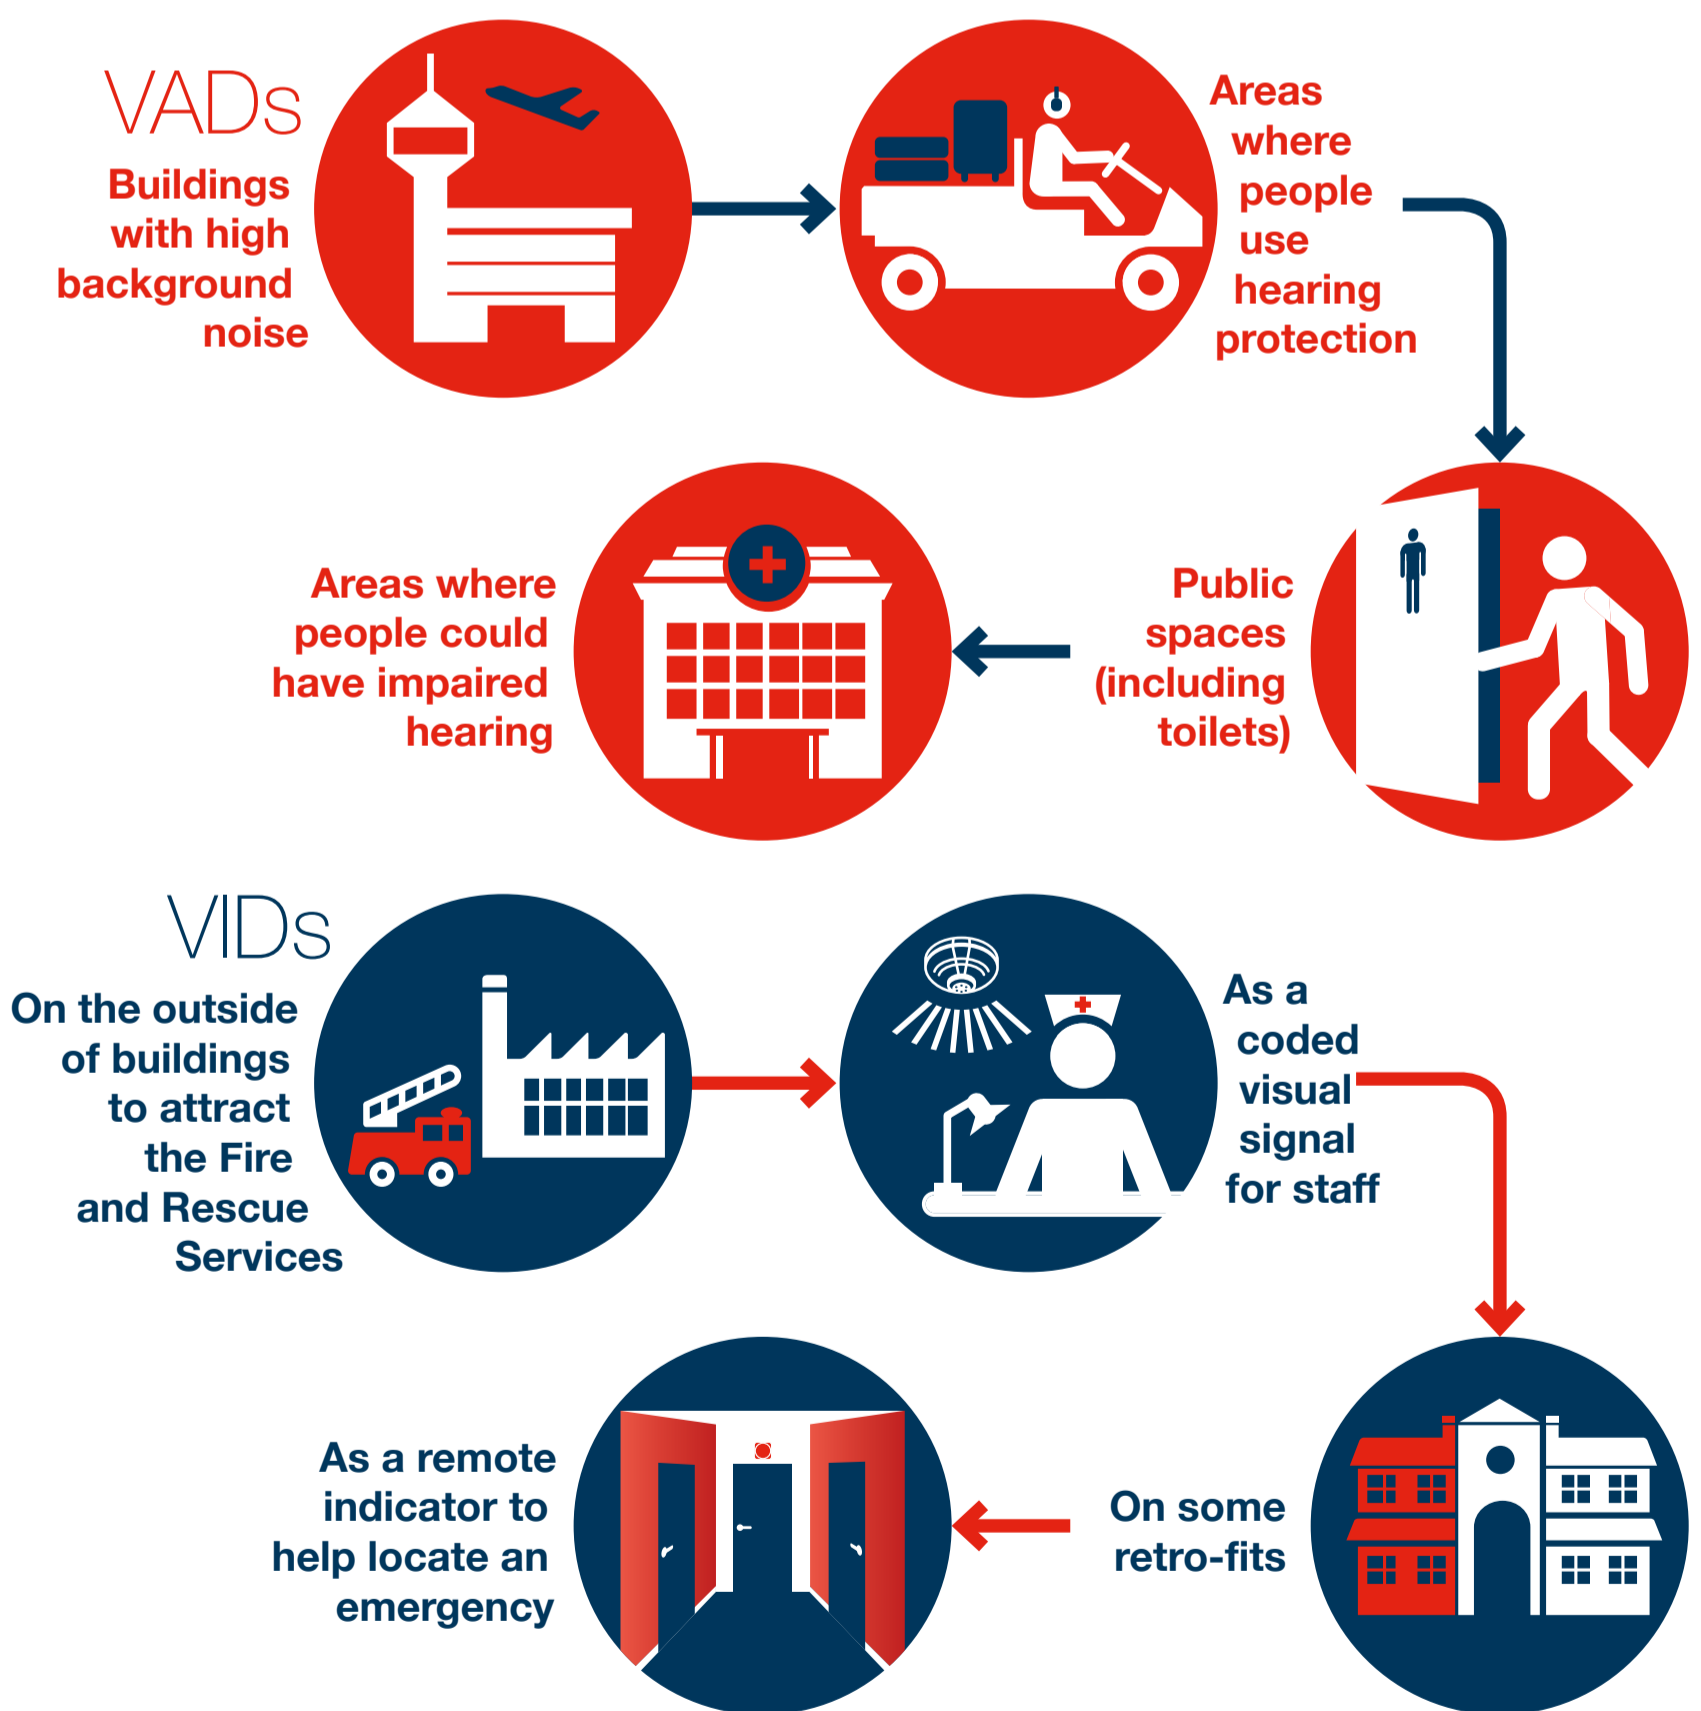

What are VADs and VIDs?

When should they be used?

Where should they be installed?

STILL CONFUSED?

You don't need to be because Gent only supplies fully certified EN54-23 compliant VADs, taking away any confusion as to what to install and where.

For more information download the Gent VAD Tool for iPad – search for **Gent VAD Tool** on the App Store.
